Subtotal _____ = \$ _____

+ tax** _____ = \$ _____

+ shipping & handling = \$ 10.00

TOTAL = \$ _____

What the Surveys Offer

Milliman's **Surveys** provide you with a comprehensive look at key rating statistics. Survey results give detailed information on:

- Costs relative to competitors
- Efficiency relative to other plans
- Hospital, physician, prescription drug and administration costs for HMOs
- Single and family premium rates
- Expected renewal rate increases
- Trends in costs over time
- Commercial inpatient utilization and average charge levels
- Physician reimbursement levels
- Profitability
- Adoption of consumer driven health approaches
- Small group medical underwriting practices

How Data is Presented

Results are presented by metropolitan area, state, region, and nationwide. They summarize the number of responses, the straight average and the 25th and 75th percentiles for premium rates, trends, utilization, average inpatient charges, physician reimbursement, medical expense ratio and HMO and PPO profitability.

How Data is Collected

Milliman sends a survey to all HMOs and PPOs nationwide with a commercial large- or mid-group product. HMOs and PPOs participate in as many geographic areas as appropriate. Each participant in the survey receives a complementary copy of the results. Individual responses and participant identities are kept strictly confidential.

I'm interested in participating in next year's Group Health Insurance Survey.
