

**Brian H. Studebaker**

MS

Principal & Healthcare Technology Consultant

**CURRENT RESPONSIBILITY**

Brian is a healthcare technology consultant with the Milwaukee office of Milliman. He joined the firm in 1993.

**EXPERIENCE**

Brian’s professional area of practice is health care information technology, primarily in decision support systems, information system selection, and underwriting system implementation. His clients include HMOs, insurance companies, employers, and other government entities. He assists clients with various projects, including MedInsight implementations, MedInsight client management, evidence-based medicine development, data aggregation projects, custom report development, claims system selection, renewal MUG implementation, and custom data warehouse development.

In addition to technology competency, Brian brings an extensive knowledge of managed care structures and business functions, such as pricing structures and provider network selection to client work. He also serves as an internal resource on HIPAA regulations and network administration.

Brian manages the Milwaukee Health Information Technology practice.

**PRESENTATIONS AND PUBLICATIONS**

“Healthcare Data Pooling: Coming Soon to a Community Near You?” published in *Journal for Healthcare Quality* in February 2008.

“Positioning Your Decision Support System for the Future,” published in *Health Perspectives* in June 2007.

“Is Your Organization Data-Driven,” published in *Consultant’s Corner* in July 2005.
