An Analysis of Supplemental Benefit Prevalence in Medicare Advantage Plans

With a focus on home-delivered meals

December 16, 2020

Adam J. Barnhart, FSA, MAAA Consulting Actuary

APPENDIX

I. RESULTS

Medicare Advantage (MA) plan supplemental benefits have significantly increased in prevalence between 2017 and 2021. Some of the benefits that have been common for many years, such as dental, vision, and hearing, are nearing 80% to 90% prevalence and are almost ubiquitous in the market. A number of other benefits, such as home-delivered meals, which have only recently been introduced, have significantly increased in prevalence. Meal benefit prevalence amongst all enrollees has increased by 10% from 2020 to 2021. Mom's Meals, a vendor providing home-delivered meals as a service for Medicare Advantage plans, engaged Milliman to conduct this analysis.

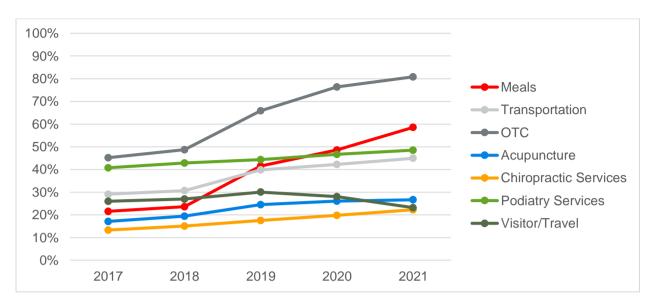

Using the 2021 Milliman Medicare Advantage Competitive Value Added Tool (Milliman MACVAT®), we conducted an analysis of supplemental benefit offerings by year. The results of that analysis are presented as line graphs showing the percentage of MA beneficiaries who are enrolled in plans that offer select supplemental benefits.

We divided the benefits in this analysis into multiple charts to enhance readability. Figure 1 shows the prevalence of meals, dental, vision, and hearing benefits. Figure 2 shows the prevalence of meals, non-emergency medical transportation, over-the-counter (OTC) benefit, acupuncture, chiropractic services, podiatry services, and visitor / travel benefits. These charts represent the nationwide MA individual market, excluding the Program of All-Inclusive Care for the Elderly (PACE), Medicare-Medicaid plans, Medical Savings Account (MSA) plans, and Cost plans.

Meal benefit prevalence increased significantly in 2019 and continues to grow in 2021, nationwide. While dental, vision, and hearing benefits remain very popular, meals saw the largest increase of any benefit from 2020 to 2021 in the number of members in a plan with the benefit. Other recently increasing benefits in popularity include comprehensive dental and OTC benefits. Over the last five years, only meals, OTC benefits, and comprehensive dental have seen year-over-year double-digit increases in the percentage of members enrolled in plans with coverage.

We also provide a series of attached charts in the Appendix that show the same information by plan cohorts, plan type, plan size, state, Medicare star rating, and for-profit status. Generally, the trends across cohorts are similar to the nationwide results, though some groups of plans have greater or lesser overall prevalence of supplemental benefits. For some cohorts (such as plans with a 5.0 Medicare star rating), there is a large change in the hearing exam benefit, which is driven by a change in the composition of the cohort for that year.

II. METHODOLOGY

In performing this analysis, we relied on the 2021 Milliman MACVAT. The MACVAT contains comprehensive MA plan details and benefit offerings for 2017 through 2021. The MACVAT uses publicly available data released by the Centers for Medicare and Medicaid Services (CMS) that is summarized into a user-friendly format. We used the February membership from each applicable year (2017 through 2020), with the exception of 2021, for which we used the September 2020 membership, cross-walked to the 2021 plans.

Figures 1 and 2 are contained in the Appendix, along with additional charts with different population and plan data underlying the charts. These population / plan splits include the following groupings:

- All plans (as displayed above)
- Split by plan type: Non-special needs plan (SNP) health maintenance organization (HMO), non-SNP preferred provider organization (PPO), non-SNP private fee-for-service (PFFS), and SNP
- Split by plan size:
 - Small (up to 20,000 members)
 - Medium (above 20,000 members, but below 250,000 members)
 - Large (above 250,000 members)
- Split by state (excluding Alaska, including the District of Columbia and Puerto Rico)
- Split by Medicare star rating
 - Below 2.5
 - 3.0 to 5.0, by 0.5 increments
 - Low enrollment and new contract
- Split by business model (for profit and nonprofit)

Each cohort is independent of the others. For example, the split by plan size includes all plan types.

III. CAVEATS AND LIMITATIONS

This report was prepared on behalf of Purfoods LLC (dba Mom's Meals). The information in this report is designed to provide insights in supplemental benefit prevalence to benchmark meal benefits against other supplemental benefits in the Medicare Advantage market. It may not be appropriate, and should not be used, for other purposes.

In completing this analysis, we relied on published information from CMS. We did not audit this information, but we did review this information for general reasonableness.

The material in this report represents the opinion of the author and is not representative of the views of Milliman. As such, Milliman is not advocating for, or endorsing, any specific views in this report related to meal benefits or other supplemental benefits.

Guidelines issued by the American Academy of Actuaries require actuaries to include their professional qualifications in all actuarial communications. Adam Barnhart is a Consulting Actuary for Milliman. He is a member of the American Academy of Actuaries, and meets the Qualification Standards to render the actuarial opinion contained herein. **APPENDIX**
