

Michael DiPrima

Data Analyst

Current Responsibility

Software Development, Data Analyst

Professional Work Experience

Michael DiPrima specializes in product development, pharmacy claims analysis, data environments, and project management. He works across different Milliman teams, supporting consultants in pharmacy claims analysis, and data warehousing. Michael is also responsible for development of MyRxConsultant, a Milliman product for pharmacy claims insights and reporting.

Michael holds proficiencies in various technical areas like SQL, .NET, C#, PHP, PowerShell, and Azure.

Michael's work within Milliman includes:

- Product planning, development, and execution of MyRxConsultant and other Milliman products
- Review and streamlining of processes for efficiency and enhancement
- Planning and support for HITRUST certification
- Audit of pharmacy claims for payors
- Data warehousing of complicated health plan structures
- Pharmacy claims processing and review for implementation errors
- Retirement Drug Subsidy reporting for Medicare Part D (RDS)
- Exploratory analysis of emerging technology and its impact on healthcare
- Drug trend research

Education

BA, Information Systems, University of Nevada, Reno
