Current Responsibility

Srinu is a consultant with the Financial Technology Group within Milliman's Financial Risk Management practice. He is actively involved in GridStep Cloud Edition product and owns a majority of the brainstorming work, architecture, technology upgrade, integration tools, and delivery of the product.

Srinu was involved in a DSM project and oversees cloud-based development and deployments.

He is also responsible for architecture, development, and deployment for IOS-based illustration tools such as PIP.

Professional Work Experience

Srinu has approximately 17 years of experience in managing, architecting, and developing software products.

Before joining Milliman, he worked as chief technology officer and architect for Danansoft, a startup company that provides cloud based solution for non-profit industry.

Prior to that, Srinu spent six years architecting software products and managing testing teams at TheNextRound, Inc., which specializes in back-office and front-office solutions ranging from CRM and portfolio management to fundraising to the private equity industry.
