

Dale N. Skinner

Information Technology Consultant

CURRENT RESPONSIBILITY

Dale is a technology consultant specializing in systems analysis and development with the Seattle office of Milliman. He joined the firm in 2001.

EXPERIENCE

Dale has accumulated extensive experience in designing and developing healthcare-related applications using a variety of technologies. He specializes in rating systems development and healthcare data warehouses. His experience includes:

- Design and development of systems implementing cutting-edge large group experience rating
- Design and development of customized OLAP reporting systems
- Large-scale office automation projects involving integrated Microsoft Office products
- Enterprise database and data warehouse design on the SQL Server 2000/2005 and Oracle 8i/9i platforms
- Developing automated data structuring engines
- Various programming languages including C#, Visual Basic, Ruby, Python, Perl, Java, and Pascal
- Internet technologies such as HTML, Java Script, ASP, ASP.NET, and Ruby on Rails
- Operating systems such as Windows (2000/XP/2003), Unix, Linux, and OS X
- Technical writing, including authoring functional and technical specifications as well as all types of system documentation, from user guides to support and maintenance manuals
- Healthcare claims data analysis
