Press Release

Milliman analysis: Funded status deficit increases by \$35 billion in February, has ballooned by \$68 billion so far in 2016

Funded ratio falls below 80% for the first time in the last 12 months

Seattle – March 8, 2016 – Milliman, Inc., a premier global consulting and actuarial firm, today released the results of its latest Pension Funding Index, which analyzes the 100 largest U.S. corporate pension plans. In February, these pension plans experienced a \$35 billion decrease in funded status due to a \$5 billion decrease in asset values and a \$30 billion increase in pension liabilities. The funded status for these pensions decreased from 80.8% to 79.1%.

“The pension funding deficit continues to move in the wrong direction,” said Zorast Wadia, co-author of the Milliman 100 Pension Funding Index. “In January, poor asset performance drove declining funded status. In February, interest rates were the culprits. We’re off to a rough start in 2016.”

Looking forward, under an optimistic forecast with rising interest rates (reaching 4.56% by the end of 2016 and 5.16% by the end of 2017) and asset gains (11.3% annual returns), the funded ratio would climb to 89% by the end of 2016 and 102% by the end of 2017. Under a pessimistic forecast (3.56% discount rate at the end of 2016 and 2.96% by the end of 2017 and 3.3% annual returns), the funded ratio would decline to 73% by the end of 2016 and 66% by the end of 2017.

Founded in 1947, Milliman is an independent firm with offices in major cities around the globe. For further information, visit milliman.com.

About the Milliman Pension Funding Study

For the past 15 years, Milliman has conducted an annual study of the 100 largest defined benefit pension plans sponsored by U.S. public companies. The results of the Milliman 2015 Pension Funding Study are based on the pension plan accounting information disclosed in the footnotes to the companies’ annual reports for the 2014 fiscal year and for previous fiscal years. These figures represent the GAAP accounting information that public companies are required to report under Financial Accounting Standards Board Accounting Standards Codification Subtopics 715-20, 715-30, and 715-60. In addition to providing the financial information on the funded status of their U.S. qualified pension plans, the footnotes may also include figures for the companies’ nonqualified and foreign plans, both of which are often unfunded or

subject to different funding standards from those for U.S. qualified pension plans. The information, data, and footnotes do not represent the funded status of the companies' U.S. qualified pension plans under ERISA.
