**Press Release**

## **Milliman analysis: Funded status drops in March by \$20 billion**

**Funded status deficit increases to \$390 billion after rates fall below 4%**

Seattle – April 15, 2016 – Milliman, Inc., a premier global consulting and actuarial firm, today released the results of its latest Pension Funding Index (PFI), which analyzes the 100 largest U.S. corporate pension plans. In March, these pension plans experienced a \$20 billion decrease in funded status due to a \$30 billion increase in asset values and a \$50 billion increase in pension liabilities. The funded status for these pensions decreased from 78.4% to 77.9%.

“These pensions lost \$83 billion in the first quarter,” said Zorast Wadia, co-author of the Milliman 100 PFI. “We saw impressive asset performance last month, but with rates slipping back below 4% for the first time since May 2015, we have an even deeper pension funding hole. Hopefully this trip below 4% is brief—the prior visit to record-low territory lasted seven months.”

This edition of the PFI reflects the annual update of the Milliman 2016 Pension Funded Study, which was released on April 7.

Looking forward, under an optimistic forecast with rising interest rates (reaching 4.23% by the end of 2016 and 4.83% by the end of 2017) and asset gains (11.2% annual returns), the funded ratio would climb to 86% by the end of 2016 and 98% by the end of 2017. Under a pessimistic forecast (3.33% discount rate at the end of 2016 and 2.73% by the end of 2017 and 3.2% annual returns), the funded ratio would decline to 73% by the end of 2016 and 66% by the end of 2017.

Founded in 1947, Milliman is an independent firm with offices in major cities around the globe. For further information, visit [milliman.com](http://milliman.com).

### **About the Milliman Pension Funding Study**

For the past 16 years, Milliman has conducted an annual study of the 100 largest defined benefit pension plans sponsored by U.S. public companies. The results of the Milliman 2016 Pension Funding Study are based on the pension plan accounting information disclosed in the footnotes to the companies’ annual reports for the 2015 fiscal year and for previous fiscal years. These figures represent the GAAP accounting information that public companies are required to report under Financial Accounting Standards Board

Accounting Standards Codification Subtopics 715-20, 715-30, and 715-60. In addition to providing the financial information on the funded status of their U.S. qualified pension plans, the footnotes may also include figures for the companies' nonqualified and foreign plans, both of which are often unfunded or subject to different funding standards from those for U.S. qualified pension plans. The information, data, and footnotes do not represent the funded status of the companies' U.S. qualified pension plans under ERISA.
